

# Hygienic Stainless Steel Valves

Our range of 316/316L stainless steel valves includes butterfly and ball (both manual and automatic), pressure relief, non-return and our compact sample valve range designed for manual liquid sampling.

Used throughout the pharmaceutical, food and beverage, dairy, brewing, cosmetic and toiletries industries, our range of valves are available with end fittings in clamp, RJT, IDF, DIN, SMS, flanges and also available as plain-ended.

# SAMPLE VALVES

Our range of manual sample valves has been developed with hygienic constraints in mind. As well as being an efficient method of taking manual samples, the valves can also be used as low holdup drain or vent valves.
